

DECORATIVE FENCE DETAIL  
OPTIONAL WOOD FENCE  
SCALE = 1" = 5'

**DESIGN CONCEPT**  
The design concept for this plan is to provide year round interest and color, while choosing plants that are low maintenance, and hardy.  
There is extensive planting around the building and parking lot, and the outer property has been kept park like, only incorporating large park type trees.

**OPTIONAL FEATURE:**  
It is not required, but can improve the appearance of the edging between the lawn and shrub beds, to install pressure treated 2x4 cut at 1' intervals to acquire a curved edge.  
Concrete curbing can also be installed to curve around the edges.

## SAMPLE CHURCH BUILDING - COMMERCIAL PROJECT

<b>LANDSCAPE STANDARDS</b> All construction to meet the requirements as set out in the BCLNA Standards, 2000 edition, prepared by the B.C. Society of Landscape Architects and the B.C. Landscape and Nursery Association jointly. Copies of the BCLNA standards are available through the BCLNA office at 1-604-574-7772. Refer to the attached Landscape Standards provided with this plan, taken from the BCLNA Standards. Contractor to consult with designer regarding any discrepancies. Contractor to consult with designer if plant substitutions are required due to availability. Contractor is responsible for obtaining written confirmation of utility locations prior to commencing digging. Contractor is responsible for providing one year of maintenance and one year warranty on all materials and workmanship, from acceptance of landscape.	
Top Soil Requirements Minimum depth for shrub beds: 60mm (2") Minimum depth for grassdown: 300mm (12") Minimum depth for lawn areas: 300mm (12") Trees as per detail on this drawing Minimum depth for mulch: 65-75mm (2.5-3")	TOTAL TREE / SHRUB BED AREA = 2,220 sq' TOTAL LAWN AREA = 48,975 sq' TOTAL LANDSCAPE AREA = 70,195 sq'
